COS30043 Interface Design and Development

Lecture 9 – Single Page Applications

1

Single-page Application (SPA)

- a web application that is contained in a single web page to provide user experience similar to desktop applications
- all code, HTML, CSS and JavaScript, is retrieved on initial page load, and appropriate resources are dynamically loaded as necessary based on response to user actions
- the entire page does not reload nor control transfer to another page
- interaction involves dynamic communication with the web server in the background

3

SPA - Route

Creating VueRouter

4 - Interface Design and Development, © Swinburne

SPA - Route (Continued)

```
// logout route
{
    path: '/logout',
    name:"logout"
},
// dashboard
{
    path: '/dashboard',
    component: Dashboard,
    name: 'dashboard'
    }
})
```

5

SPA - Menu

SPA – Menu (Continued)

```
methods: {
    logout() {
        this.$root.logout();
    }
}
```

SPA – Login component

9

SPA – Login component (Continued)

20 menues 2 co.g.: and 2 creiopment,

SPA – Login component (Continued)

```
// Login check
fetch("resources/api_user.php/", requestOptions)
.then( response =>{
   //turning the response into the usable data
   return response.json();
.then( data =>{
 //{\tt This} is the data you wanted to get from url
        if (data == null) {// didn't find this username password pair
                self.msg="username or password incorrect.";
        }
        else{
                 this.$emit("authenticated", true);
                          //$emit() function allows you to pass
                          //custom events up the component tree.
                 this.$router.replace({ name: "dashboard" });
.catch(error => {
       self.msg = "Error: "+error;
N.B. "..." indicates lines of code which are not shown here
```

11

SPA – Login component (Continued)

```
template: `
<v-form ref="form" v-model="valid" lazy-validation>
       <v-text-field v-model="input.username"</pre>
              :counter="10" :rules="usernameRules"
              label="Username" required>
       </v-text-field>
       <v-text-field v-model="input.password"</pre>
              label="Password" type="password"
              :rules="passwordRules" required>
       </v-text-field>
       <v-btn :disabled="!valid" color="success"</pre>
             class="mr-4" @click="login()"> Login
       <v-btn color="error" class="mr-4" @click="reset">
           Reset
       </v-btn>
</v-form>

13

Pagination using Vue JS Paginate

• Link vuejs-paginate.js file in the HTML

```
<script src="js/vuejs-paginate.js"></script>
```

Register VuejsPaginate component
